## Problem Statement:

It's hard to find a pharmacy near you and has your needed medicine in stock.

## The Proposed Solution:

The main purpose of project is to help people to find the medicine they need in the fastest time, helping medical field to grow in Egypt and saving time for our users.

The main target is Egypt, the first release will be in Kafr El Shiekh city then will spread to other city then cover all cities of the country

The product is a web application that help people to find their medicine at the nearest place to them, its interface should be simple so that any one use it easily. We can say that it's a GPS for medicine in Egypt.

Search Engine to fulfill the user needs: find the medicine.

Log in page for the pharmacy's owners who want to add their products in the database of the site

## Goals:
- Make finding medicines easier.
- Help people in critical situations.
- Help medical field to grow in Egypt as the pharmacies will sell more.
